

Paint Protection Film (PPF) Installation for Advanced Level Technical Experience Course

Synopsis

This concentrated ten-day training initiative aims to provide participants with the crucial expertise and understanding needed for adeptly installing Paint Protection Film (PPF). The program features a well-organized curriculum spanning from foundational to advanced installation methods each day. Graduates of this program will emerge as adept PPF installation specialists, capable of delivering precise and top-tier installations. Their comprehensive skill set, and meticulous approach will pave the way for success in the ever-evolving realm of PPF installation.

Audience

New and experience PPF installers, entrepreneurs or anyone seeking to enhance their skills and knowledge in the field of PPF.

Course Objective

The course aims to equip participants with a thorough skill set required for precise, expert, and confident PPF installation. At the course's conclusion, a practical examination will assess participants' proficiency to ensure their competency in PPF installation techniques.

Pre-requisite :
None

Duration :
10-day (9.00am - 5.00pm)

Course Delivery Mode :
Theory, Demonstration and Practical

Course Modules

Day 1

- Theoretical Class - Understanding PPF Construction
- Identifying Types of PPF
- Question and Answer Session

Day 2

- PPF Cutting Techniques - Knife Skills Tutorial
- Instruction on Calculating Construction Materials
- Question and Answer Session

Day 3

- PPF Installation Stretching Tutorial
- PPF Installation Edging and Cornering Tutorial
- Question and Answer Session

Day 4

- Theoretical Instruction for Installing PPF on Front Hood, Roof, and Rear Trunk
- Practical Instruction for Installing PPF on Front Hood, Roof, and Rear Trunk
- Question and Answer Session

Day 5

- Theoretical Instruction for Installing PPF on Front Fenders, Front and Rear Doors, and Rear Fenders
- Practical Instruction for Installing PPF on Front Fenders, Front and Rear Doors, and Rear Fenders
- Question and Answer Session

Day 6

- Theoretical Instruction for Installing PPF on Front Bumper
- Practical Instruction for Installing PPF on Front Bumper
- Question and Answer Session

Day 7

- Theoretical Instruction for Installing PPF on Rear Bumper
- Practical Instruction for Installing PPF on Rear Bumper
- Question and Answer Session

Day 8

- Installation Tutorial for Mirrors, Headlights, and Small Accessories
- Review Session
- Question and Answer Session

Day 9

- Exam - Timed Completion of Front Set PPF Package (*Front Bumper, Engine Bonnet, Front Fenders, Front Headlights, Side Mirrors*)

Day 10

- Learning Review and Question and Answer Session

Learning Outcome

By the end of the course, participants will acquire the practical expertise and understanding necessary to skillfully apply PPF to entire vehicles. This includes mastering techniques such as knife grip and precision cutting, effectively removing bubbles, managing edges and small curves, and applying proper stretching methods for optimal outcomes.
