

Window Tint Installation for Intermediate Level Technical Experience Course

Synopsis

This is a five-day training designed to equip participants with the knowledge and skills necessary to excel in automotive window tinting. This comprehensive course provides a deeper understanding of the window tint market, the tools and their functions, and a detailed step-by-step guide for removing old tint and installing new tint, along with essential precautions at each stage. Participants will benefit from a combination of theoretical instruction, instructor demonstrations, hands-on practical experience, and feedback to ensure a well-rounded understanding and competence in window tinting.

Audience

Experience window tint installers, car enthusiast or individuals interested in mastering the art of automotive window tinting.

Course Objective

This course aims to provide participants with a comprehensive practical experience in removing old tint and installing new tint for both general car side windows and rear windscreens using the right tools and techniques. It will also enhance intermediate-level skills, including handling complex installations and troubleshooting challenging scenarios.

Pre-requisite :

None

Duration :

5-day (9.00 am - 5.00 pm)

Course Delivery Mode :

Theory, Demonstration and Practical

Course Modules

Day 1

- Overview of different types of tint available in the market and their construction precautions.
- Understanding tools and their functions commonly used in window tint installation.
- Step-by-step instructions on effectively removing old tint from car windows.
- Effective preparation of side window materials and collectible moldings.

Day 2

- Step-by-step installation process for general car side windows.
- Essential precautions and troubleshooting common mistakes.

Day 3

- Step-by-step installation process for general car rear windscreens.
- Techniques for handling rear windscreen curves and contours.

Day 4

- Handling complex rear windscreen shapes and challenging installations.
- Heat shrinking techniques for curved glass applications.

Day 5

- Full vehicle tint application practice and instructor evaluation.
- Certification assessment and final review.

(Inclusive Theory, Instructor demonstrations, hands-on practical exercises, and feedback)

Learning Outcome

Become proficient in identifying and working with various types of tint available in the market while understanding the necessary construction precautions for each type. Master the essential tools and techniques required for window tint installation, including the systematic removal of old tint from car windows. Learn the proper preparation methods for side window materials and collectible moldings to ensure a seamless installation process. Gain confidence in applying tint to both side windows and rear windscreens while adhering to important safety measures. Additionally, develop troubleshooting skills to handle complex window shapes and challenging tinting scenarios with precision.
